Select Training Units now come with an iManifold and probes!

- TU-406C RESIDENTIAL HEAT PUMP TRAINER
- TU-701 TABLE-TOP HEAT PUMP TRAINER
- TU-100 BASIC REFRIGERATION TRAINER
OUR COMMITMENT TO QUALITY EDUCATION

At iConnectTraining we strongly believe in providing the HVAC/R student with the knowledge and training for the safe and efficient operation of all types of systems found in our industry.

We also believe that prior to going out into the field, the student should fully understand the theory and operational or service techniques behind each specific system.

iConnectTraining provides the finest training units to the educational market. They can be found in high schools, technical colleges, government facilities and other educational settings all over the world.

The training units in this catalog represent a wide variety of subjects in the heating, refrigeration and air conditioning industries. The training units range from demonstrating simple concepts to illustrating advanced troubleshooting and servicing techniques. Our expertise certainly does not end here. We can custom design and build trainers to your exact specifications and needs. For custom requirements or applications, please give us a call at 716.699.2031.

Our company’s goal is to provide top quality trainers at reasonable prices that fit our customers’ precise needs. We look forward to working with you.
TU-100 BASIC REFRIGERATION TRAINER

This training unit demonstrates domestic refrigerator and freezers, self-contained air conditioning units and reverse cycle or heat pump systems.

Specifications

1/3 HP hermetically sealed reciprocating compressor.

Panels are 1/4" thick HDPE with steel reinforced component shelf

Uses HFC 134A refrigerant

Electrical requirements: 120VAC; 50/60 Hz; 10A

Overall size: 36" L x 18" W x 73" H

Features

• Sight glass tubes at inlet and outlet of evaporator and condenser constructed of explosion-proof, tie-bolt design

• Drip pans with drains located under each evaporator and condenser

• Uses popular, brand name components

• Color-coded valves, gauges, and hand valves to bypass various components and change from cooling to heating (heat pump operation)

• Conditions of refrigerant and oil can be observed under various methods of operation

• Pressure gauges located at each point in which pressure variation is likely to occur

• Refrigerant flow to evaporator metered either by capillary tube, automatic expansion valve (AXV), or thermostatic expansion valve (TXV)

• Evaporator and condenser copper tube coils with aluminum fins and variable speed fans

• A combination low pressure control and high pressure cutout and a thermostatic control with a range of -30°F to 100°F furnished

• High pressure cutout in the circuit at all times to prevent damage to the compressor

• Includes Lab Manual and Instructor Guide

Shipping Weight: 450 lbs.
Shipping Dimensions: 49" L x 45" W x 87" H

This Training Unit includes an iManifold Kit for full diagnostic testing and troubleshooting of system components. The kit comes complete with the award-winning iManifold wireless digital refrigeration manifold, (1) 902M Thermistor Air Probe, (3) 901M Thermistor Pipe Strap Surface Probes, and (1) iManifold backpack. Additional accessories such as hoses, wireless probes, and the iConnect hub are also available.
TU-105 COMMERCIAL REFRIGERATION TRAINER

Specifications
Compressor: Single phase, 1/2 HP semi-hermetic (bolted reciprocating-type) 120VAC, 60 Hz, 15 Amp

Evaporators and condenser: Copper tube coils with aluminum fins and variable speed fan mounted on back of panel

Uses HFC 134A refrigerant

Mounting stand: 72" L x 18" W x 72" H

Panels: ¼" thick HDPE with steel reinforced component shelf

Electrical requirements: 120VAC, 60 Hz

Features
- Sight glass tubes at inlet and outlet of evaporators and condenser constructed of explosion-proof, tie-bolt design
- Cut-out and by-pass valves
- Hand valves allow malfunctions to be simulated
- Many control changes are possible
- Combination low pressure control and high pressure cut-out
- Thermostatic control with an adjustable range of –30°F to 100°F
- 2 solenoid liquid line valves
- Includes Lab Manual and Operation Instructions

Shipping Weight: 950 lbs.
Shipping Dimensions: 81" L x 45" W x 88" H

This Training Unit includes an iManifold Kit for full diagnostic testing and troubleshooting of system components. The kit comes complete with the award-winning iManifold wireless digital refrigeration manifold, (1) 902M Thermistor Air Probe, (3) 901M Thermistor Pipe Strap Surface Probes, and (1) iManifold backpack. Additional accessories such as hoses, wireless probes, and the iConnect hub are also available.
TU-155 INDUSTRIAL REFRIGERATION TRAINER

This trainer enables students to learn principles of commercial and industrial refrigeration systems.

Specifications
Utility Requirements: city water, drain to water, and means of venting water tower

Electrical Requirements: Single phase, 240VAC, 60 Hz, 40A (115 VAC, 60 Hz for water tower)

Overall Size: 100” L x 27” W x 74” H

Water Tower: 60 Hz, single phase, 60,000 BTU/hour.
(This is an optional add-on)

Features
• Trainer: Self-contained and freestanding with storage space underneath
• Compressor: Semi-hermetic type with 2 HP capacity
• Crankcase heater with automatic control system
• 2 forced air type evaporators have 2 common types of defrost mechanisms complete with solenoids, timers, and associated equipment
• 2 standard types of water cooled condensers (tube-in-tube and shell-in-tube) are supplied and piped to be used with city water and optional water tower
• Hot gas by-pass system keeps operating pressures of the compressor constant regardless of the evaporator level
• Crankcase pressure regulator allows the compressor to start easily under high evaporator pressures
• Includes Instructor Guide

* NOTE: 240V plug not included

BASED ON OPTIONS, WILL SHIP IN 1 TO 2 CRATES
Shipping Weight and Dimensions:
Crate 1: 1200 lbs. / 99” L x 48” W x 92” H
Crate 2: 150 lbs. / 99” L x 48” W x 92” H
(Crate 2 is the optional Water Tower)

This Training Unit includes an iManifold Kit for full diagnostic testing and troubleshooting of system components. The kit comes complete with the award-winning iManifold wireless digital refrigeration manifold, (1) 902M Thermistor Air Probe, (3) 901M Thermistor Pipe Strap Surface Probes, and (1) iManifold backpack. Additional accessories such as hoses, wireless probes, and the iConnect hub are also available.
TU-420 REFRIGERATION TRAINER, DEMONSTRATOR

This refrigeration demonstrator uses the 4 main parts of the refrigeration system (condenser, compressor, evaporator and control device) that demonstrate basic refrigeration principles. The components then work together to cool a small enclosed refrigerator compartment fully featured with an electronic temperature control device.

Specifications

Electrical requirements: 120VAC, 60 Hz, 15A

Overall size: 19” L x 19” W x 50” H

Weight: 115 lbs.

Features

• Components arranged to illustrate the cycle nature of refrigeration
• 3 strategically located explosion-proof sight glasses permit monitoring of the refrigerant as it circulates throughout the entire refrigeration system
• 120VAC with circuit breaker
• Comes completely assembled, charged with refrigerant, and ready to operate
• Includes Lab Manual

Shipping Weight: 380 lbs.
Shipping Dimensions: 37” L x 37” W x 61” H

This Training Unit includes an iManifold Kit for full diagnostic testing and troubleshooting of system components. The kit comes complete with the award-winning iManifold wireless digital refrigeration manifold, (1) 902M Thermistor Air Probe, (3) 901M Thermistor Pipe Strap Surface Probes, and (1) iManifold backpack. Additional accessories such as hoses, wireless probes, and the iConnect hub are also available.
TU-701 TABLE-TOP HEAT PUMP TRAINER
Real world experience in troubleshooting wiring, piping and controls on a working heat pump unit. The trainer is perfect for introduction to heat pump theory.

Specifications
Electrical Requirements: 120VAC; 50/60 Hz; 10A
Overall Size: 32" L x 17 1/2" W x 31" H

Features
• Trainer — pre-piped and pre-wired with all in complete view
• Refrigeration heat pump cycle can be observed
• Pressure, temperature and electrical readings can be made
• Sight glass tubes before and after metering device constructed of explosion-proof, tie-bolt design
• Evaporator and condenser: copper tube coils with aluminum fins and fixed speed fans
• Pre-piped suction and high pressure refrigeration tubing is visible for direct observation of the fluid and gas stages of the refrigeration cycle
• All necessary line voltage wiring
• 120VAC with circuit breaker
• Includes Lab Manual and book Heat Pumps: Operation, Installation, & Service, with student assignments

Shipping Weight: 175 lbs.
Shipping Dimensions: 37" L x 48" W x 40" H

This Training Unit includes an iManifold Kit for full diagnostic testing and troubleshooting of system components. The kit comes complete with the award-winning iManifold wireless digital refrigeration manifold, (1) 902M Thermistor Air Probe, (3) 901M Thermistor Pipe Strip Surface Probes, and (1) iManifold backpack. Additional accessories such as hoses, wireless probes, and the iConnect hub are also available.
TU-206 RESIDENTIAL AIR CONDITIONING TRAINER

Real world experience in troubleshooting wiring, piping and controls of a working air conditioning unit for a whole house.

Specifications
Electrical requirements: 240VAC; 50/60 Hz; 15A

Overall size: 33" L x 70" W x 65" H

Features
• Fault simulation with two refrigerant faults and four electrical faults
• Provides numerous real-world applications and trouble-shooting examples
• Refrigeration cycle can be observed
• High-pressure refrigeration tubing piped to sight glass for direct observation of the fluid stage of the refrigeration cycle
• Pressure, temperature and electrical readings can be made
• Visible wiring and piping
• R410a refrigerant can be pumped down
• Metering device/thermostatic expansion valve
• 2 sets of pre-connected high and low pressure refrigeration gas/liquid gauges
• Necessary line and low voltage wiring
• Low voltage transformer and wiring
• Includes Lab Manual and book Refrigeration and Air Conditioning Technology
• Optional add-on equipment package provides all the professional tools necessary to complete service checks (see page 16)

Optional Unit Configuration
• TU-206: Base unit (as shown)
• TU-206D: Base Unit with Duct Work ONLY
• TU-206TV: Base Unit and TV ONLY
• TU-206C: Base Unit with TV and duct work added (Deluxe as shown)

* NOTE: 240V plug not included

Shipping Weight: 600 lbs.
Shipping Dimensions: 80" L x 43" W x 72" H

This Training Unit includes an iManifold Kit for full diagnostic testing and troubleshooting of system components. The kit comes complete with the award-winning iManifold wireless digital refrigeration manifold, (1) 902M Thermistor Air Probe, (3) 901M Thermistor Pipe Strap Surface Probes, and (1) iManifold backpack. Additional accessories such as hoses, wireless probes, and the iConnect hub are also available.
TU-406 RESIDENTIAL HEAT PUMP TRAINER
Real world experience in troubleshooting wiring, piping and controls of a working air conditioning unit for a whole house.

Specifications
Electrical requirements: 240VAC; 50/60 Hz; 15A
Overall size: 60" L x 48" W x 73" H

Features
- Fault simulation with two refrigerant faults and four electrical faults
- Provides numerous real-world applications and troubleshooting examples
- Refrigeration heat pump cycle can be observed
- High-pressure refrigeration tubing piped to sight glass for direct observation of the fluid stage of the refrigeration cycle
- Pressure, temperature and electrical readings can be made
- Visible wiring and piping
- R410a refrigerant can be pumped down
- Reversing valve that is operated through a digital thermostat
- Metering device/thermostatic expansion valve
- 2 sets of pre-connected high and low pressure refrigeration gas/liquid gauges
- Operation Manual describing how the unit works as well as its faults
- Necessary line and low voltage wiring
- Low voltage transformer and wiring
- Includes Lab Manual and book Heat Pumps: Operation, Installation, & Service, with student assignments
- Optional add-on equipment package provides all the professional tools necessary to complete service checks (see page 16)

Optional Unit Configuration
- TU-406: Base unit (as shown)
- TU-406D: Base Unit with Duct Work ONLY
- TU-406TV: Base Unit and TV ONLY
- TU-406C: Base Unit with TV and duct work added (Deluxe as shown)

* NOTE: 240V plug not included
TU-208 COMBINATION FORCED AIR & HYDRONIC HEATING TRAINER

The forced air and hydronic heating trainer provides demonstration and service practice with forced air and hydronic heating systems, including hot water heating systems. All components are full size, completely operational and are standard brands of equipment.

Specifications
Trainer can be custom built to meet your needs

Electrical Requirements
240VAC, 50/60 Hz

Features
• A student experiment manual specifically written for this equipment.
• Experiments include: Introduction of Principles, References, Pre-Lab Questions, Lab Procedure, Post-Lab Exercises
• Includes Lab Manual and two books, Refrigeration and Air Conditioning Technology and Heat Pumps: Operation, Installation, & Service, with student assignments

This unit has multiple customizations.
Choose from:
• Heat Pump/Condensing Unit
• Air Handler/Gas Furnace
• Electric Boiler
• Gas Fired Boiler
• Oil Fired Boiler

4 CRATES
Shipping Weight:
(3) at 600 lbs, (1) at 200 lbs; 2,000 lbs total
Shipping Dimensions:
Crate 1-3: 79” L x 43” W x 72” H
Crate 4: 79” L x 43” W x 36” H

This Training Unit includes an iManifold Kit for full diagnostic testing and troubleshooting of system components. The kit comes complete with the award-winning iManifold wireless digital refrigeration manifold, (1) 902M Thermistor Air Probe, (3) 901M Thermistor Pipe Strap Surface Probes, and (1) iManifold backpack. Additional accessories such as hoses, wireless probes, and the iConnect hub are also available.
TU-302 CONTROL BOARD, ELECTRIC HEAT TRAINER

This trainer is perfect for students to learn the basics of electric heat control systems.

Specifications
Electrical Requirements: 120VAC, single phase, 60 Hz

Overall Size: 35"L x 13"W x 30"H

Weight: 70 lbs.

Features
• Complete set of operating controls of an electric furnace
• Wired 3 element furnace circuit
• Simulated heater elements operation shown by signal lamps
• Sequences
• Klixon limit switch
• Fusible link safety device
• Thermostat
• Transformer
• Fan delay control
• Board designed for use on a bench or table
• Includes Instructor Guide

Shipping Weight: 110 lbs.
Shipping Dimensions: 37" L x 48" W x 40" H
TU-502 GAS FIRED HEATING CONTROL BOARD

The control board contains a complete set of electrical controls for a furnace, with air conditioning, to demonstrate basic principles and provide electrical service experience.

Specifications
Electrical Requirements: 120VAC, single phase, 60 Hz
Overall Size: 35”L x 13”W x 30”H

Features
• All components are panel mounted and the wires are brought to terminals on the front panel
• Equipped for both thermocouple and thermopile systems
• Signal lamps show simulated operation of burner valves, circulating fan air, and air conditioning compressor

Shipping Weight: 130 lbs.
Shipping Dimensions: 37” L x 48” W x 40” H
TU-521 CONTROL BOARD, SINGLE PHASE COMPRESSOR TRAINER

Consists of an actual single phase compressor with components necessary to demonstrate all common types of controls in refrigeration and air conditioning systems.

Specifications
Electrical requirements: 120VAC, single phase, 60 Hz

Overall size: 35" L x 13" W x 30" H

Features
- Components are put into the system with patch cords
- Shut-off valves in suction and pressure lines allow pressures to be varied to operate the low pressure control and high pressure cutout
- PSC (permanent split capacitors) and running capacitors are supplied for capacitor (capacitive) start systems
- Includes Lab Manual

Shipping Weight: 190 lbs.
Shipping Dimensions: 37" L x 48" W x 40" H
**TU-101 DOMESTIC REFRIGERATION BUILD-UP TRAINER**

Companion to the Motors, Controls and Circuit Trainer (Model TU-501) described on page 13. Designed for the student that has a working knowledge of the theory of refrigeration. Using this trainer, students are asked to design a system to match specifications of a particular situation. Instruction kit and experiment manual provide set-up and assembly directions.

*The double evaporator simulates a dual evaporator system application that demonstrates basic principles and provides service experience.*

**Specifications**

Electrical Requirements: 120VAC, 50/60 Hz, 10 A

Overall Size: 36" L x 18" W x 73" H

**Build-up Trainer**

Components are provided for backboard mounting in preferred arrangement. (Mounting hardware not included.)

**Features**

- 1/4 HP hermetic compressor with air-cooled condenser
- Domestic freezer static evaporator
- Finned high humidity evaporator
- Capillary tube
- Dehydrator
- Temperature control
- Hand valve to regulate temperature differences in evaporator
- Includes Lab Manual and Instructor Guide

**Shipping Weight:** 350 lbs.

**Shipping Dimensions:** 49" L x 45" W x 87" H
TU-501 MOTORS, CONTROLS AND CIRCUITS BUILD-UP TRAINER

Designed for the student with a working knowledge of the theory of refrigeration electrical control systems. Using this trainer, students are required to design a system to match specifications of a particular situation.

Connections between components are wired by the students.

Specifications
Panels are 1/4" thick with steel reinforced component shelf

Electrical Requirements: 120/240VAC, 1 Phase, 60 Hz

Overall Size: 36" L x 18" W x 73" H

Build-up Trainer
Components are provided for backboard mounting in preferred arrangement. (Mounting hardware not included.)

Features
- Single phase disconnect
- 24V transformer
- Duplex receptacle
- Low voltage thermostat
- Defrost timer
- Low-pressure switch
- High-pressure switch
- Oil pressure switch
- Fan/limit switch
- Heating sequencer
- Motor starter
- Start/stop switch
- Current relay-Potential relay
- Start capacitor-Run capacitor
- Single-phase compressor
- Capacitor start motor-PSC motor
- Enclosed storage compartment
- Includes a Lab Manual with explanations of the theory of operation

Example of lay-out build-up.

Shipping Weight: 350 lbs.
Shipping Dimensions: 49" L x 45" W x 87" H
TUE-150 RESIDENTIAL WIRING TRAINER

This Trainer Panel is used to demonstrate electrical principles similar to those found in a residential dwelling. It also has provisions for extensive switching and connection of lamps and outlets. The trainer has a 24 volt power supply that is used to wire and test all circuits. After the instructor has approved wiring, 120 VAC can be applied using the key-lock circuit breaker control. The ability to use low voltage for testing and 120 VAC for final wiring is a valuable teaching aid. The inclusion of the dual 24 VAC power supply makes this a very useful trainer for introductory classes. Since all initial breadboarding and testing can be done at low voltage, the 120 VAC is only made available to the trainer after the instructor has used the key to turn on the Electro-Lock to apply 120 VAC. Students learn wiring as well as the proper electrical hookups from the manual that is included.

Specifications

Electrical requirements: 120VAC

Overall size: 31" L x 36" W x 25" H

Features

- Low voltage pushbutton “doorbell” switch
- Pilot light to indicate low voltage, 24V, “ON”
- A low voltage buzzer
- Two standard duplex receptacles
- GFI duplex receptacle
- Two lamp sockets
- Pilot light to indicate 120VAC is “ON”
- Two three-way toggle light switches
- Standard residential 4 circuit breaker panel
- Three wire grounding 120VAC cord
- Includes Lab Manual

Shipping Weight: 175 lbs.
Shipping Dimensions: 37" L x 48" W x 40" H
TUE-200 RESIDENTIAL WIRING DEMONSTRATOR

Students gain a full understanding of National Electrical Code residential electrical circuits. Through real-world application practice, students attain a substantial beginning level skill and proficiency using tools of the electrical trade.

Specifications
Electrical requirements: 240VAC
Overall size: Triangular Layout: 67" x 67" x 99", 90" Height

Features
• Casters, locking hardware, inter-connecting twist lock plugs and caps to connect the ceiling section. Folds to occupy minimum floor space. Sturdy construction and completely wired. Trainer will provide 100-Amp service.
• 2 & 3-way switches
• Lights controlled from 1 or more locations
• Central distribution with circuit breakers
• EMT conduit, romex and greenfield wiring
• In-wall and surface mounted wiring devices
• Low voltage signaling devices, 120 and 240VAC, 3-wire Edison wiring
• Control and installation-fluorescent lighting
• Control and installation-incandescent lighting
• Includes two books, National Electrical Code Book and Electrical Wiring Residential that offer students opportunities for hands-on practice in interpreting and applying Code requirements, making this an ideal resource for those who will work in the residential electrical industry.

* NOTE: 240V plug not included

Shipping Weight: 350 lbs.
Shipping Dimensions: 93" L x 44" W x 64" H
EP-525 RESIDENTIAL A/C AND HEAT PUMP EQUIPMENT PACKAGE

This is a great selection of tools and analytic equipment for the HVAC Tech. A service wrench sized for accessing refrigerant ports and valves, a Halide Leak Detector for detecting refrigerant leaks, a Super Vak-Check for measuring vacuum, a multi meter for electrical readings, and a high quality vacuum pump for pulling vacuum on a system.

Features
- ¼” x 5/16” service wrench
- Leak detector kit
- Multimeter with temperature probes and clamp
- Vak-Check
- 6.0 CFM Vacuum pump

EP-626 DELUXE RESIDENTIAL A/C AND HEAT PUMP EQUIPMENT PACKAGE

All the same great tools and analytic equipment found in the EP-525, plus an iManifold kit.

Features
- All the features in EP-525 kit shown above, plus:
- iManifold kit, complete with the award-winning iManifold wireless digital refrigeration manifold, (1) 902M Thermistor Air Probe, (3) 901M Thermistor Pipe Strap Surface Probes, and (1) iManifold backpack. Additional accessories such as hoses, wireless probes, and iConnect hub are available.

iManifold™ Works the Way You Do!

From residential to refrigeration, the iManifold system replaces the mechanical manifold and accommodates the simplest to the most complex systems you service. Modular and expandable, the Zigbee mesh network of wireless probes outperforms all Bluetooth solutions by talking probe to probe, or probe to your iManifold or iConnect®. Using this cutting-edge technology, the signal can be repeated and transmitted to almost unlimited distances.

- **Residential**
  - Real-time system performance calculations
  - Powerful onboard diagnostics
  - Automatic airflow calculation
  - Powerful reporting features
  - Efficiency and time savings

- **Commercial**
  - Calculates performance targets
  - Monitor multiple stages
  - Wireless probes transmit through equipment panels
  - Automatic airflow calculation

- **Refrigeration**
  - Monitor multiple compressors
  - Monitor evaporator and total superheat at the same time
  - Monitor and set superheats on up to 12 cases simultaneously
  - View superheat, box temperature, saturation temperature and pressure from a single probe

- **Intelligent Communications Platform**

  Easily getting the “smart” from your smart device

  From the probes to the iManifold™/iConnect® into the iManifold Cloud then back to the interested party, the iManifold platform is all about getting verifiable data from the field to the decision maker. Show your customers with confidence and professionalism that the service you sell provides the value they expect.

- **Inspiring the Future of HVAC**
  - Offer real cutting-edge technology solutions
  - Increased equipment sales
  - Increased contractor satisfaction
  - Reduced warranty claim processing

- **Distributor**
  - Increased profitability; typical return on investment in 3 months or less
  - Reduced call backs
  - Uniform service and installation processes
  - Lightning-fast field technical support using Tech Connect™
  - Includes latest AHRI Database
  - Huge productivity gains

- **Contractor Support**

  - Tech Connect™

  Remotely view a live version of what your technicians are seeing in the field.

  Verification in Field assures that the data reported is the actual data measured in the field.

  All reports include your company, customer and equipment information as well as measurement data collected.

- **DRIVEN BY iCONNECT®™**

  - Verify new install system performance
  - Delivery of engineered efficiency
  - Access to quality field data
  - Increased brand satisfaction through optimal operation
  - Reduced warranty claims

- **OEM**

  - Verified field data
  - 3rd party verification without travel
  - Easy integration of exported data
  - Rock-solid software and hardware

- **ESCO/Utility**

Productivity Gains
with either the iManifold™ or iConnect®

The award-winning iManifold - the first smart device compatible digital manifold - uses remote viewing on a technician’s smart device. Download the free iManifold App and your smart device will display system pressures, temperatures, superheat and subcooling while simultaneously calculating performance targets. Eliminate manual calculations, analyze data, troubleshoot and generate performance reports directly from your smart device.

The iManifold App becomes more powerful with each new release. New wireless probes for temperature, humidity, and pressure are designed to greatly improve technician productivity and jobsite efficiency.

The iConnect provides a portable wireless solution. Range issues are eliminated because the iConnect travels with you. A roaming node within the network, the iConnect reconfigures its path to the probes, providing the technician with significant jobsite mobility.

The 900M with Integrated Manifold.

Tech Connect™
Share field data in real time: tech-to-tech, tech to wholesaler, or tech to manufacturer. Tech Connect allows you to stream data to anyone within your group for troubleshooting help or simply a second set of eyes. Use video, voice, text, and email to communicate.

Equipment Profiling
Profile A/C, refrigeration or heat pump systems. The iManifold application troubleshoots over 40 different problems and measures airflow, performance, efficiency and more.

Reporting
Powerful reporting software gathers all of the field data in seconds with a push of a button. Formatted, verified, and delivered to email, standard and custom reports are available to keep your technicians consistent and wow your customers.

Quick Tests
The iManifold application offers several quick tests for airflow and heating applications. These standard industry tests, now automated by the iManifold application and software, are super fast and done to a high degree of accuracy.

Trending
Trending allows the technician to see changes in performance, visually, by graphing measurements as they happen. See where measurements are headed to ensure that equipment performance is trending in the right direction.

Probe Mapping
The iManifold application allows the user to have almost complete control of what probes are used to take what measurements. Users can quickly map probes for ambient temperatures, air temperatures, pressures and more.

Cloud Services
Cloud Services allows access to Tech Connect, cloud storage, web-based reporting, report storage, sorting, and gives your technicians access to data from the field.

Wireless
Let’s face it: wireless is only great when it works. Zigbee mesh allows for multiple-path communication in an easily expandable network and provides long-range communication.

</table>

Organize your gear & outfit yourself with a new backpack! Included in all kits.
“Your training units are fabulous! I teach 4 year-long HVAC classes each year. I bought two of each of your training units that I have, because they are great value. I love your products. They look professional, and I plan on buying more next year.”

– Mark Vernon, HVAC Instructor
Cochise College, Arizona

Right: One of the Cochise College HVAC students learning trouble-shooting on the TU-100.

“I like the fact that we have an unobstructed view of the workings of the air handler, and we can show students the parts without having to take covers off. Now that they are on a smaller platform, it’s easier to move from classroom to classroom. These Training Units are well put together, and everything is sturdy. They give us the ability to mimic service problems and have students try to overcome them with good methodology.”

– Emilio Gelfenstein,
Campus Director & Chair of HVAC Program
Florida Career College, where TU-206 and TU-406 units were installed in early 2017

Production in progress on various Training Units in our plant.
All Training Units are built right here in our plant in Western New York State.
