

Electric Torque Wrench Learning System

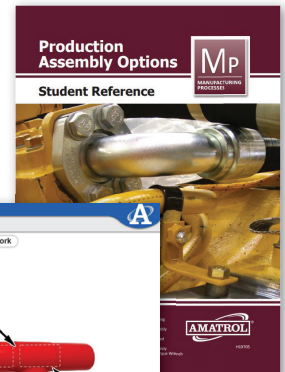

95-PAS3

Electric Torque Wrench Learning System (95-PAS3)

Interactive Multimedia Curriculum and Student Reference Guide

Learning Topics:

- Operation of Electric Impulse Torque Wrench
- Fastener Assembly Using an Electric Torque Wrench

The Electric Torque Wrench Learning System (95-PAS3) teaches learners how to use a high-speed, precise torque tool. Precision assembly requires accurate fastener tension in bolted assemblies. Amatrol's Electric Torque Wrench training system teaches the operation and application of electric torque wrenches with threaded fasteners.

This production assembly training system includes an electric torque wrench, a 19mm box head drive, multimedia curriculum for both theory and lab, and teacher's assessment guide. The multimedia curriculum includes virtual simulation of key skills, allowing learners to practice skills in advance of actually working on the equipment. This system uses industrial quality components to help assure that students are better prepared for what they will encounter on the job and to withstand frequent student use.

Technical Data

Complete technical specifications available upon request.

Electric Torque Wrench Interactive Multimedia Curriculum (N19042)
Instructor's Guide (C19042)
Installation Guide (D19042)
Student Reference Guide (H19705)

Additional Requirements:

- Adds to Production Assembly Learning System (950-PAS1)
- Requires PC, see amatrol.com/support for PC requirements
